# Introduction

This document details the information carried in the Briscoes iDOC-format Purchase Order Response messages that are sent back to Briscoes by vendors.

It is essential that all suppliers be tested for both Order Units of Measure Eaches and Cartons regardless of whether Briscoe Group currently purchase in carton quantities. It is vital and necessary that this EDI Message type is included in our testing as in the future we may change to buying in carton quantities from you.

If a Supplier currently only uses eaches we will be adding cartons so we can test this scenario. You will be advised of these prior to commencing Test Packs with EDIStech.

This Message Implementation Guide includes:

- A worked example of a Briscoes purchase order response from a vendor
- Full documentation for each of the iDOC segments that are used in this message.
- The matching iDOC format purchase order responses used in this documentation.

## Distributing this document

The document contains information that is to be considered commercially sensitive to Briscoes Group, Rebel Sports and EDIStech Limited. This document may not be distributed to anyone else outside of the immediate project team without permission being granted by Briscoe Group Limited.

## Further reading

This Message Implementation Guide should be read in conjunction with the following Briscoes and Rebel Sports publications:

- *Trading electronically with Briscoe Group.* This guide outlines the Briscoe e-commerce initiatives including the messages that are sent and how to complete the vendor on-boarding processes with Briscoes.
- *The Briscoes iDOC Purchase Order Message Implementation Guide.* This guide outlines the structure and usage of the Purchase Order messages that Briscoes and Rebel Sport send to their vendors.
- *Examples specific to your company.* The examples in this guide are generic. Briscoes provided a pack of test orders with your own products in them that you can use during development. Similar orders will be used later during implementation and on-boarding with Briscoes. During the on-boarding, Briscoes will request that your system responds to these orders according to different scenarios.
- *Matching example Purchase Orders in human-readable format.* For each iDOC-format example, Briscoes and Rebel Sports have provided a matching human-readable copy of each order.

## About EDISTech Limited

Briscoes has retained EDISTech to manage the on-boarding of our vendors, working alongside the Briscoes and Rebel Sports teams. Once you have decided to link up to our systems, EDISTech will assist you with each step of the implementation and testing.

The EDIS network provides a connection point to allow your computer to exchange documents with Briscoes SAP® order management system. EDISTech also maintains local and international links to other e-commerce companies like themselves, known as *interconnects*. If you are already exchanging documents with other retailers or customers via a Value-Added Network, EDISTech can work alongside your providers to connect you and start the documents flowing. If you do not already have a link to any other network, EDISTech can provide a direct connection to Briscoes via the EDIS network.

The EDIS network also facilitates a range of *interconnects* to other network providers throughout the world including:

- GXS
- SPS Commerce
- B2BE
- Sterling Commerce
- INOVIS

During implementation, EDISTech will assist to connect you to the Briscoes e-commerce system via The EDIS network or your preferred network provider.

# Creating Purchase Order Responses

For each Briscoes or Rebel Sports purchase order that is sent to a vendor, a purchase order response should be returned. This advises the buyer that the products can be supplied on the date requested. If the vendor cannot supply the total quantity or cannot supply the items by the required date, the order response can carry that information and the buy will be notified when the Briscoes SAP/R3 is updated.

This guide illustrates all the expected scenarios and how to report them to Briscoes:

## Supplied in full

Example file *iDOC Purchase Order Response 45000038166\_Supplied\_In\_Full.txt* shows an Order Response where the vendor has acknowledged that all lines can be supplied in-full by the requested delivery date.

## Some items cannot be supplied in full

Example file *IDOC Purchase Order Response 45000038166\_Short\_Supplied.txt* shows an Order Response where the vendor cannot supply the full quantity of all items:

| Order Line Number | Vendor response                                                                                                                             |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| 00010             | None of the items ordered on this line can be supplied. This product code and price is correct but no inventory is available for this item. |
| 00020             | Only four of the seven items can be supplied. The remaining items have not been backordered.                                                |

## Entire order has been cancelled or rejected

Example file *iDOC Purchase Order Response 45000038166\_Rejected\_Or\_Cancelled.txt* shows an Order Response where the vendor cannot supply the full quantity of all items. This same format is used when Briscoes or Rebel Sports cancels an entire order by sending a Purchase Order Change requesting the cancellation.

## Price and delivery date change

Example file *IDOC Purchase Order Response 45000038166\_Price\_Date\_Changed.txt* shows an Order Response where the vendor cannot supply the full quantity of all items by the requested delivery date. This same format is used when Briscoes or Rebel Sports changes the requested delivery date by sending a Purchase Order Change. The vendor has also advised that the price on a line was incorrect.

| Order Line Number | Vendor response                                                                   |
|-------------------|-----------------------------------------------------------------------------------|
| 00010             | Delivery date has been changed to 18 <sup>th</sup> December.                      |
| 00020             | The item price is incorrect. The vendor has sent a corrected price for this line. |

## Item codes are incorrect

Example file *IDOC Purchase Order Response 45000038166\_Incorrect\_Items.txt* shows an Order Response where product item codes are incorrect.

| Order Line Number | Vendor response                                                                                                                                                                                                      |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 00010             | <p>The GTIN or the vendor's item code is incorrect. The line will not be supplied.</p> <p>This sort of error is always followed up manually by the vendor and the buyer so that a corrected order can be issued.</p> |
| 00020             | <p>The vendor product code is incorrect. The vendor has sent a corrected vendor code and set the status to show that the line is accepted with changes.</p>                                                          |

### Note:

For all subsequent Purchase Order Responses after the first Purchase Order Response, if the supplier has rejected any lines in their previous responses, then these rejected lines should not be included in the subsequent responses. If Briscoes have cancelled any lines in their Purchase Order Change, then these cancelled lines should not be included in the subsequent responses.

## XML Purchase Order Response message segments

The segment specifications below show each of the fields that are used in the ORDERSEXT message. Many iDoc segments are not used in this implementation. They are included when the message is sent but not documented here.

### EDI\_DC40 Message Header

The Message Header marks the start of a new purchase order response message. Mandatory

| Tag                                              | Description                               | Min/<br>Max | Notes                                                                                                                                                                                                  |
|--------------------------------------------------|-------------------------------------------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <?xml<br>version="1.0"<br>encoding="utf-8"<br>?> | XML message<br>header                     |             | Standard XML message header. Note that the iDoc is encoded as a UTF-8 format message rather than Unicode or UTF-16 format.                                                                             |
| <ORDERSEXT><br><IDOC BEGIN<br>=1>                | Start of the IDoc<br>ORDERSEXT<br>message |             | Only one purchase order response is packed into each ORDERSEXT envelope.                                                                                                                               |
| <EDI_DC40<br>SEGMENT="1">                        |                                           |             |                                                                                                                                                                                                        |
| <TABNAME>                                        |                                           |             | Always EDI_DC40                                                                                                                                                                                        |
| <MANDT>                                          |                                           | 3/3         | Always 300. Not used.                                                                                                                                                                                  |
| <DOCNUM>                                         | Unique<br>document<br>number              | 16/16       | The unique document sequence number. Can be used in conjunction with the <SERIAL> segment to uniquely identify this message. This is always padded with leading zeros.                                 |
| <DOCREL>                                         | Document<br>release number                | 3/3         | Currently 701 – not used.                                                                                                                                                                              |
| <STATUS>                                         | Document<br>status                        | 1/3         | Always 53 - represents an original document released to SAP                                                                                                                                            |
| <DIRECT>                                         |                                           | 1/3         | Always 2                                                                                                                                                                                               |
| <IDOCTYP>                                        | IDoc message<br>type code                 | 1/10        | Always ORDERS05 for Purchase Orders and Order Responses.                                                                                                                                               |

| <BSART>                       | Document type                                    | 1/4         | Document type. This is the same as the document type code of the original Purchase Order that is being confirmed. Possible entries are ZNB, ZNR, ZNS and ZWB (Other values may also be supplied).                                                    |
| <BELNR>                       | Document reference                               | 1/35        | Briscoes or Rebel Sports Purchase Order Number. This is the primary order reference number that is being quoted back on Order Response. All Purchase Order Change messages for this original Purchase Order will also have carried this same number. |
| <RECIPNT_NO>                  | Sender                                           | 10/10       | Identifies the sender of the message. This is always the Briscoes or Rebel Sports vendor code that was sent in the original Purchase Order segment <RECIPNT_NO>. Always padded with leading zeros                                                    |

## E1EDK02 Document Header Reference Information

Carries the original purchase order number and the order creation date as well as the vendors own sales order number. Mandatory

|                               |                                                           |         | 002                                                                                                                                                                                                                                                                                                                                                                                                                  | Vendor or vendors sales order number.                            |
| <BELNR>                       | Vendors reference confirmation number                     | 1/35    | Reference number. When the qualifier is 001, this value is the Purchase order number that is being responded to. This is the same number that is used in the <E1EDK01> <BELNR> segment. When the qualifier is 002, this should be a unique incrementing sequence number generated by the vendors system. This ensures that each Purchase Order Response is displayed in the correct sequence by the Briscoes system. |                                                                  |
| <DATUM>                       | Order date                                                | 8/8     | Reference date in the format YYYYMMDD. Where the qualifier is 001, this is the Purchase Order creation date. When the qualifier is 002, this is the date that the vendor or vendor responded to the original order.                                                                                                                                                                                                  |                                                                  |
| <UZEIT>                       | Order time                                                | 6/6     | Reference time in the format HHMMSS. Where the qualifier is 001, this is the Purchase Order creation time. When the qualifier is 002, this is the order response time.                                                                                                                                                                                                                                               |                                                                  |

## E1EDP01 Purchase Order Response Line Details

Carries the details of each order response line. There is one E1EDP01 group for each line, nested in a group of segments for each line:

<E1EDP01 SEGMENT ="1"> ← document line group  
 <E1EDP02> ← required purchase order reference group  
 <E1EDP20> ← required schedule and delivery date group  
 <E1EDP19> ← product identification group – Briscoes or Rebel Sports item code  
 <E1EDP19> ← product identification group – The vendor or vendors own item code  
 <E1EDP19> ← product identification group – The item barcode or GTIN, assigned by the vendor.  
 <E1EDP01>

Where the order is items to be delivered to more than one store, each there will be a separate E1EDP01 group for each product for each store.
